engaged in intense online gameplay, relaxing to your favorite tunes or watching a movie in the evening, you can count on clear, dynamic and spacious sound that takes you right into the middle of the action. Every sound rings out in detail, so nothing escapes your attention - from subtle background noises to powerful explosions.

Sound that matters

Excellent sound quality is the foundation of GENESIS Arsen 302BT speakers. The set was designed for users who do not recognize compromises - both in gaming, listening to music or watching movies. The speakers offer crisp highs, well-balanced mids and powerful, deep bass, giving every sound a boost of intensity. This translates not only into better spatial orientation during gameplay, but also a more emotional reception of music and clearer dialogue in movies. This makes the GENESIS Arsen 302BT more than just an entry-level audio device - it's a tool that allows you to dive even deeper into the world of sound and enjoy it to the fullest.

Flexible equalization - the sound you like

Built-in equalization gives you the ability to fully customize the sound to your preference. Whether you're a fan of intense bass, neutral settings, or emphasized treble, the Arsen 302BT allows you to precisely adjust the sound according to your current mood, musical genre or type of game. It's a solution that gives you freedom - you can create your own sound environment, tailored perfectly to your needs. For the user, this means not only convenience, but also a much higher listening comfort - without having to reach for external applications or equalizers. Importantly - the Bassreflex output has been placed at the front of the speakers. This solution allows you not to worry about the amount of space behind the speakers, so it makes it easier to place them on a desk or cabinet.

Full freedom of wireless connection

With Bluetooth compatibility, the GENESIS Arsen 302BT speakers offer exceptional convenience. The ability to connect wirelessly to your computer, laptop, smartphone or tablet makes using the equipment simpler and more flexible. The lack of cables means not only more order on your desk, but also mobility - you can quickly change the sound source without switching any wires. Stable and fast signal transmission guarantees smooth playback without delays, which is especially important when playing games or watching movies.

Style that suits you

GENESIS Arsen 302BT is not only great sound, but also a stylish addition to any workstation. The speakers are available in two color options - classic black and natural brown - so you can easily match them to your desk arrangement. Their modern, minimalist design will emphasize the character of any workstation, while maintaining an elegant appearance. This is equipment that not only sounds, but also looks, aesthetically complementing a space where both form and sound matter.
