solution for professional IT installations where USB devices need to be connected over longer distances. The integrated repeater electronics enable consistently stable data transfer at up to 5 Gb/s – ideal for applications where a passive extension is no longer sufficient.
Thanks to support for current operating systems such as Windows XP and above and macOS version 9.0 and above, the cable is versatile and can be used in a wide range of environments, whether in the office, in the technical room or in industrial environments. The high-quality workmanship and robust design support reliable use in professional IT structures. Note: The cable is not cascaded and must not be combined with other active USB extensions.

USB 3.2 Gen.1 standard (backward compatible with USB 3.0)
Connector: USB-A plug to USB-A socket
Colour: Black
Length: 5
Data transfer rate: up to 5 Gb/s
Not cascading (not suitable for series connection)
