InLine Cat.6A coupling set, waterproof IP68, 2x RJ45 F/F, 1:1

Model: 69990R

Manufacturer: INLINE

EAN: 4043718291670

Product Code: 1479779

R947

Highest protection class IP68: The fully shielded RJ45 connector offers reliable protection against water and dust in demanding outdoor applications.
Industrial-grade design: The UV-resistant housing and temperature range from -40 °C to 85 °C enable use in extreme conditions.
Universal compatibility: Compatible with standard RJ45 patch cables with a cable diameter of 3 to 8 mm - for maximum flexibility.
High data transfer rate: Supports transfer speeds of up to 10Gb/s for modern network requirements.
Simple screw connection system: Two M25 threaded connections enable secure installation without special tools.

The InLine® Cat.6A patch cable socket is the ideal solution for industrial network connections in outdoor areas. With its IP68 protection class, it ensures reliable performance even under extreme weather conditions. The robust, UV-resistant housing permanently protects the sensitive RJ45

connection from water, dust, and temperature fluctuations.
Thanks to its industrial-grade design, the jack is ideal for applications in production facilities, on construction sites, or in telecommunications systems. Its ease of use is impressive in everyday use: Two M25 threads enable tool-free, secure installation. Standardized RJ45 patch cables with a cable diameter of 3 to 8 mm can be easily integrated.
Technologically, the coupling impresses with its performance: it enables data rates of up to 10Gb/s, reliably meeting even modern IT and communication requirements. The 1:1 connection guarantees loss-free signal transmission—an important basis for interference-free communication and control in professional networks.
Whether for temporary use or as a permanent solution, this patch cable jack delivers the highest quality and reliability for professional applications.

Contact resistance:< 10 mOhm
Connection type:1:1
