Same Crispy Taste with Less Oil

Air Crisp Technology uses a powerful convection fan to cook your food up to twice as fast as a traditional oven and reduce your food's oil content by up to 85%*, giving it the same crispy taste without the health drawbacks.

Healthier Results in Less Time

Air frying preserves more nutrients in your food than other types of cooking such as deep-frying, boiling, or poaching.

Mealtime Made Easy

Take care of the rest of your to-do list with the help of smart features that take the hassle out of home cooking.
