Want a means of identifying your bag? Want proof that the bag you have is yours?

Want a means for your luggage to be clearly identifiable in the instance it has gone astray?

Luggage tags have traditionally been used by bus, train and airline companies to route luggage to a final destination. However, it is common knowledge, particularly in airports, that some bags go astray and that your luggage sits amongst hundreds of other similar bags of luggage at the baggage carousel. This can make it very difficult to identify which is yours and increases the potential for one customer to take your bag in error when tired after a long flight. One means of making your bag stand out would be to paint it florescent green or yellow but why go to these extremes when you can simply, quickly and easily add one of these Hama Luggage Tags to your bags.
