L-BOXX 102 Professional: Further information

Product Highlights

The L-BOXX 102 offers an improved storage and transport solution in line with the Bosch Mobility System. The improved L-BOXX click mechanism allows stacked boxes to be easily opened for convenient handling. Extensive compatibility of the L-BOXX variants, tool inlays, and the Sortimo in-vehicle system provides full flexibility. Its securely closing latches and durable material are key elements of its robust design, while its additional front handle makes the box easy to carry close to the body. It is suitable for storage and transport with the Sortimo in-vehicle system, Aluminium Caddy, and L-BOXX Roller.

Equipment & Application

The L-BOXX 102 has a top-load capacity of up to 100 kg, an in-box load capacity of up to 25 kg, and a tensile strength of 50 kg. It has also been recognised for outstanding design with a 2017 International Design Award, a 2018 German Design Award, and a pro-K award.
