When clarity matters, count on precision. Offering dual video outputs at 4K@30 Hz and 2K@60 Hz, every detail stands out, every color pops, and every moment is crystal clear, setting the standard for premium visual fidelity.

Seamless Visuals with DisplayPort™ Alternate Mode

In the realm of digital displays, DisplayPort™ Alternate Mode via Type-C® stands unparalleled. This cutting-edge connection ensures an uninterrupted, pure, and superior visual journey. From every frame to each intricate scene, every graphic signal is transmitted with immaculate precision.

- TWO MONITORS: With the simultaneous use of a 4K monitor at 30 Hz plus a 2K monitor at 60 Hz on our DockingStation, you treat yourself to a high-quality viewing experience. Every detail is displayed with eye-pleasing clarity and working efficiently is effortless
- HANDY: The compact design makes the DockingStation flexible for all situations. The integrated USB-C connection cable enables immediate use with the latest PCs, notebooks or mobile devices
- DIVERSITY: Connected to the host computer via a USB-C cable, Gigabit Ethernet, SD/microSD card readers, 2x HDMI and 3x USB-A ports are available. In addition, mobile devices can be charged with up to 100 W via Power Delivery (if a power supply unit is connected)
- VIDEO TECHNOLOGY: With the DP Alt Mode Technology of this DockingStation, the graphic signals of your host computer are passed through directly, provided that it has the DisplayPort Alt Mode functionality. For maximum performance and best connection
- OPERATING SYSTEMS: Our device works smoothly with Windows, macOS and Chrome OS. No driver installation required if your host computer supports this technology. Just plug in and go
