R20,244

This touchpad allows control of any device with commands over TCP IP or RS-485 connections. The programming is done via Lindy Pro Control software, a platform to set up the unit and manage any device with commands in a simple and effective way. In addition is possible to manage the programmed projects from your smartphone or tablet via Lindy Pro Control app downloadable from Google Play Store and Apple Store.

The capacitive touchscreen supports 1280x800 (16:10) resolution, buttons design and background picture are fully customizable from the software to provide always the best solution for any kind of installation.

An adjustable metal bracket is integrated on the rear side to position the unit correctly at the right angle on a desk.
