ATEN USB VGA KVM Extender with Audio and RS-232 (200m)

Model: CE750A

Manufacturer: ATEN

EAN: 4719264643859

Product Code: 1494530

R8,151

The CE750A is a USB-based KVM Extender with automatic signal compensation and RS-232 serial functionality that allows access to a computer system from a remote USB console (USB keyboard, monitor, and USB mouse).

Because it allows access to a computer system from a remote console, the CE750A is perfect for use in any type of installation where you need to place the console where it is conveniently accessible, but you want the system equipment to reside in a safe location – for example away from the dust and dirt of the factory floor or the harsh environment of a construction site.

The CE750A improves on previous designs by the addition of an RS-232 port, on both the Local and Remote Units, that allows you to connect to a serial terminal for configuration (Local Unit) or serial devices such as touchscreens and barcode scanners (Remote Unit).
