R1,086

EXPERT METALMAX FOR LONG LIFE CUTTING HARD METAL

When hardened screws rust or otherwise get stuck, cutting them off perfectly flat to the surface is the only option. The EXPERT MetalMax makes a perfect flush cut even in hardened metal and, with its outstanding longevity, is the perfect accessory for the tradesman wanting to cut tough materials with a multitool.

You've seen the multitool's astonishing ability to cut into and through wood with ease: with the Bosch EXPERT MetalMax Blade for Multitool metal gets the same treatment. It even cuts hardened window screws and rebar with ease.
