7-Port USB Hub with Type-C plug for more ways to connect your USB-A devices

The Manhattan 7-Port USB 3.2 Gen 1 Type-C Hub turns one of your device's USB-C ports into seven USB-A ports, so you can easily connect a keyboard, mouse, flash drive and more. Devices that fit the USB 3.2 Gen 1 spec (formerly known as USB 3.0) can reach transfer speeds up to 5 Gbps for external storage, printing and more. The Hub's SuperSpeed ports are backward compatible to run older USB versions 2.0 or even 1.1, too. You can also charge your phone or tablet since the Hub supplies up to 5 V / 0.9 A of power.

Connectivity you can take with you

This Hub's durable case, compact size and bus power mean greater portability for you when you have to pack up and go. You don't have to worry about carrying an additional power supply, which makes the Hub an ideal travel companion. Simply unplug it from your upstream device, disconnect your peripherals and put what you need in your laptop bag to be on your way. Alternatively, if you find that you need more power for your devices, the Hub includes a Micro-USB port to connect your own 10 W USB charger.

Universal compatibility for easy installation

This universal USB 3.0 Hub will work with a wide range of computers because it requires no additional software or drivers. It installs automatically when you connect it to your laptop or desktop so you can be up and running quickly. It also works with a range of operating systems such as Windows®, macOS®, Linux and ChromeOS, so it’s multi-platform compatible.
