Product Code: 1500682

R764

For connecting a computer with a DVI-I output to a VGA monitor!

This high-quality cable allows you to connect a computer with a DVI-I analogue output to a VGA monitor with a 15 Way VGA Female connector (i.e. a monitor with a removable VGA cable).

Many modern graphics cards feature both DVI-I (digital and analogue) and VGA (analogue) connectors. This cable is useful when you want to connect two VGA monitors to a computer equipped with one of these cards - simply connect the first monitor to the VGA port and the second, using this cable, to the DVI port!

- Connectors: DVI-A Male to VGA 15 Way HD Male;
- Cable colour: Black;

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

- 10 Year Warranty;
- Length: 3m.

Please note: The DVI-A connector used in this cable mates to the analogue pins incorporated in the DVI-I interface to send the analogue signal to the VGA input on your monitor. It does not convert DVI digital signals to VGA analogue!
