Hama 00176593 thermostatic radiator valve Suitable for indoor use

Model: 00176593

Manufacturer: HAMA

EAN: 4047443449542

Product Code: 1503532

R3,039

Step by step to the Smart Home: with the Hama Smart Solution app, you can expand and network your smart home with any number of Hama Smart Home products

- With the WLAN heating control, the temperature of radiators can be regulated easily via app or voice control, e.g. switched on and off at certain times
- Smart radiator thermostat including Smart base (Zigbee): control or automate the temperature of a radiator from anywhere
- Simply swap the old radiator regulator for the smart radiator thermostat
- Freely definable programmes and different modes offer plenty of options for control and automation, e.g.: automatically heating when the outdoor temperature drops
- Integrated outwards mode
- High compatibility: works with Amazon Alexa, Google Assistant, iOS and Android. Can also be

connected to all Alex and Google Assistant-compatible smart home products from other manufacturers

- Simple start: the smart radiator thermostat set is ideal for intelligently upgrading an apartment or house, but also for supporting people with physical disabilities
- This means that you can save energy with targeted control including - usefully - while out and about, if you have forgotten to switch the heating off. That's because you are always kept up to date about the current status via the app
- Can be fitted to all common radiators thanks to the included adapter
- Familiar control with rotary regulator
- Very sleek design, display only visible during operation
- Very low power consumption since Zigbee transfer technology uses very little energy
- Voltage supply via two AA Mignon batteries
- Your data is stored exclusively on German servers
