

Hercules Stream 200 XLR Black 9 buttons

Model: 4780934

Manufacturer: THRUSTMASTER

EAN: 3362934746346

Product Code: 1505622

R5,005

FULLY CONTROL THE AUDIO CONTENT BEING PLAYED FOR YOUR AUDIENCE IN A FLASH!

Hercules Stream 200 XLR is an audio controller featuring a built-in sound card, allowing streamers to separate the audio mix that they’re listening to from the mix being played for their audience. Thanks to this audio controller with a built-in LCD screen, you can manage all your audio sources in real time: games, chat software, music, XLR microphone, game console, second computer, and more. Hercules Stream 200 XLR lets you enjoy a customized experience by individually viewing and controlling the sound level of each audio track — for you, and for your audience! Instantly enable, turn down the volume, turn up the volume, mute or unmute the sound! More than an audio controller, Hercules Stream 200 XLR is also a command center! You’ll love using the 4 handy assignable action buttons to customize your controls (multiple mute, URL launcher, scene change…). Stop worrying about audio settings and focus on your viewers. SEE YOUR SOUND.
