

Yealink RoomSensor Pro Multifunctional room sensor Black, White

Model: 1303123

Manufacturer: YEALINK

EAN: 6938818317000

Product Code: 1506370

R8,004

Yealink RoomSensor Pro is designed specifically for conference rooms, using Yealink's sophisticated AI algorithm to accurately count people. It also detects environmental factors such as light, temperature, and humidity, covering a wide area with high accuracy. It seamlessly connects to Yealink gateway devices via Bluetooth, sharing data proactively. This enables intelligent strategies and works with IoT devices, creating a smarter meeting experience.

Smart People Counting

RoomSensor Pro recognizes both dynamic and static individuals, enabling precise people counting. It reports data to RoomPanel/Plus for intelligent room occupancy or release, aiding administrators in optimizing the management of conference room resources. The number of people will be

prominently displayed on the RoomPanel for easy monitoring.

Cozy Meeting Environment

RoomSensor Pro automatically monitors the lighting, temperature, and humidity in the conference room, providing real-time data to Yealink gateway devices. The third-party IoT platform integrated into the gateway devices can use this data to intelligently control lighting, curtains, air conditioning, and other devices, ensuring a consistently cozy meeting environment.

Wide Detection Area

Covering an impressive 50 square meters, a single RoomSensor Pro effortlessly fits in small to medium-sized meeting rooms. Furthermore, it can be paired with up to 4 RoomSensors to expand coverage and meet the demands of larger conference spaces.

Customizable Detection Zones

Customize up to 8 detection zones, like Area 2 and Area 3 shown in the picture, within RoomSensor Pro's detection range (Area 1). This ensures the best performance in different conditions and meets specific local detection needs.

Flexible Deployment

Supporting both DC and PoE power options eliminates concerns about battery life. Choose between 3M adhesive or drilling for fixation, and with a detachable base and body design, deployment, disassembly, and maintenance are hassle-free.
