

StarTech.com 4 Port Gigabit Power over Ethernet PCIe Network Card - PSE / PoE PCI Express NIC - TAA

Model: ST4000PEXPSE

Manufacturer: STARTECH

EAN: 065030855150

Product Code: 1509280

R8,007

Add 4 Gigabit Power over Ethernet ports to a PCI Express-enabled computer

The ST4000PEXPSE 4-Port PoE NIC lets you add four Gigabit Power over Ethernet ports through a single PCI Express slot. Each port can provide up to 25.5W of power, combining network data and power over a single Ethernet cable for reduced cable clutter and added convenience for remote PoE

devices.

The PCI express PoE card supports the IEEE 802.3 AT Class 1 and Class 2 (Type 1) standard for Power Sourcing Equipment (PSE), and can deliver up to 50V DC power to compliant Powered Devices (PD). This eliminates the need for a separate power source and data connection for PoE devices such as IP cameras, IP phones or wireless access points.

Suitable for any standard profile PCIe-enabled client, server or workstation, the PoE network card supports features such as Jumbo Frames (up to 9KB), VLAN tagging and Wake on LAN (WoL).
