Turn a USB Type-C™ port on your laptop into four USB Type-A ports (5Gbps), plus power and charge your laptop

This compact USB 3.2 Gen 1 hub lets you add four USB-A ports to your laptop, with support for USB power delivery. This means that you can power and charge your laptop through its USB-C™ port while simultaneously powering the hub.

With its integrated USB Type-C™ cable and small-footprint design, this versatile hub offers a perfectly portable solution for connecting devices that require traditional USB Type-A ports to your USB-C or Thunderbolt™ 3 equipped computer.

Take it with you wherever you go

With its compact and rugged design, you can take this portable USB 3.2 Gen 1 hub anywhere you go. Because it's so compact, it's easy to tuck into your laptop bag and only takes up a small amount of desk space when you connect it to your workstation. For portable applications, having the integrated host (USB-C) cable means one less thing to remember to carry with you.

Carry fewer cables and power adapters

This USB-C 3.2 Gen 1 hub supports USB Power Delivery 2.0 pass-through up to 60W to power and charge your laptop. Now, instead of carrying multiple cables and power adapters, you can use your laptop's USB-C power adapter to power both your laptop and the hub. By using just a single power adapter instead of two, you can eliminate clutter and hassle when you work.

Add four USB 3.2 Gen 1 ports in seconds

This USB hub is multi-platform compatible, which means it will work with a wide range of USB-C laptops that use a USB-C power adapter. It also works with a range of operating systems such as Windows®, macOS, Linux® and Chrome OS™. It installs automatically once you connect it to your laptop, so you can be up and running in seconds.

The HB30C4AFPD is backed by a StarTech.com 2-year warranty and free lifetime technical support.
