USB clock for Professional TVs

This accessory is created specifically for Professional TVs. It provides an efficient solution for permanent time display in guest rooms and can be conveniently attached to the TV via USB. There is no additional power source needed.

Automatic time sync

This clock is always accurate without a need to set the time separately. Via the USB connection the display automatically syncs with the accurate time that the TV receives via the broadcast signal.

Easy clock visibility

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
