

ACT DisplayPort to MTP/MPO adapter set to extend a DisplayPort connection up to 8K@60Hz (AK4165)

Model: AK4165

Manufacturer: ACT

EAN: 8716065539288

Product Code: 1513410

R7,648

Extend an 8K DisplayPort signal over a distance up to 300 meters with the AK4165 DisplayPort to MTP/MPO adapter set. The adapter set is suited for use with OM3/OM4 MTP/MPO cables with polarity B. The transmitter (TX) and receiver (RX) units are easily exchangeable. Take advantage of the benefits of fiber optics.

Advantage of fiber optic

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

With an OM3/OM4 MTP/MPO cable the optimal signal, bandwidth and speed are maintained over the entire length of max. 300 meters (with OM4, max. 100m with OM3). The data and video is sent via fiber and is therefore not affected by Electromagnetic Interference or Radio Frequency Interference.

Flexible TX and RX placement

The transceiver (TX) and the receiver (RX) are easily exchangeable. Instead of a standard uni-directional cable, the TX and RX can be used bidirectionally by only swapping the source and display cable ends instead of the complete cable.

Also available

Besides the DisplayPort MTP/MPO adapters, an HDMI adapter set is available as well.
