Fast is a State of Mind

Gaming and work areas often overlap in modern living spaces: the Speeder is designed with this versatility in mind. Inspired by the world of racing, its sleek frame rolls the aesthetic flair of a performance car chassis into the room, and its ergonomic features help you maintain a healthy posture whether you’re racing against the clock at crunch time or seizing that in-game clutch moment. Chenille Yarn mesh provides tactile comfort, while precisely tunable backrest height, lumbar and seat depth ensure a perfect fit. 3D Hyperrotation armrests rotate within a 225° range, allowing multiple positions whether you’re on mobile, console or reclining. The Speeder supports

your body to keep your hands and mind agile, so when it comes down to the wire, you can work fast...and play hard.

Need For Speed

The sleek, racing car-inspired design brings the dynamic energy of the racetrack to your home office or gaming setup. Elements of supercar build are assimilated into the Speeder’s architecture: the X-frame forming the backrest’s support structure offers both strength and stylishness, and the finish replicates the look of premium automotive coatings.

Body Friendly

The backrest indents with a curve to accommodate the natural contours of the waist, enhancing support and comfort for the lower back. A waterfall seat slopes downward to reduce tension and friction on the back of the thighs: this feature relieves knee pressure and improves blood circulation to the lower limbs, promoting equal weight distribution across the seat pan due to its contoured construction.

Tactile Comfort

The Speeder is engineered for long-term comfort. It features a Chenille Yarn mesh that provides a tactile, breathable seating experience, perfect for long hours of gaming or work.

Support System

3D Hyperrotation armrests provide a wide range of motion, supporting various arm positions, while the headrest adjusts for personalized comfort.

A Perfect Fit

Precisely tunable backrest height, lumbar support, and seat depth allow you to fine-tune the chair to your exact anthropometry for maximum ergonomic benefit.

Put Your Feet Up

The retractable footrest offers additional leg support for added comfort, especially during extended periods of use.

Adaptive Damping

The Speeder’s tilter automatically modulates the speed and resistance of recline to body weight without needing manual operation, absorbing impact from sudden movement for a smoother and more controlled backwards shift. All you have to do is lean back, and lock in your recline angle within a 45° range with the easily accessible control switch.

Safety First

The Speeder is TÜV certified, conforming to BIFMA safety and durability standards.

BEST IN CLASS: Class 4 Gas Lift Cylinder

The class gas lift cylinder is TÜV certified, guaranteeing safe, reliable and smooth height adjustment.

Noiseless Mobility

A sleeve on the caster’s spoke eliminates noise, allowing the Speeder to glide across any surface as quiet as it’s effortless. At 75mm diameter, the plus-size wheels vastly enhance stability.
