Work comfortably by bringing your laptop closer to eye level for better ergonomics and viewing angle

This rotating laptop stand raises laptops to a more natural viewing position. A compact and ergonomic solution for improving workspace comfort. Ideal for desks at home, in the office, or on the go.

Adjustable Height and 360° Swivel

Laptop riser helps to elevate the screen's position closer to eye level for improved posture and viewing. The base features a 360° swivel mechanism, allowing effortless rotation of the entire stand for quick adjustments, screen sharing or collaborative work without moving the stand. The laptop tray also tilts to help optimize viewing angles. Raised front flanges keep the device secure when tilted, and rubber pads protect against cosmetic damage. The arms tension can be adjusted using the included tool.

Large Base and Well Vented Design

The stand is made from aluminum with a space grey anodized finish for a sturdy build and clean look. The vented platform promotes passive airflow to aid heat dissipation and maintain stable device temperatures. The space underneath the laptop platform can be used to place a keyboard, mouse, or other accessories and peripherals when not in use. When collapsed, the riser measures approximately 8.4×10.2x3.1-inch (21.5x25.9x8cm) making it easy to transport and store.
