InLine Y-power cable 1x CEE 7/7 angled / 2x 3pin IEC C13 male, 1.8m

Model: 16653

Manufacturer: INLINE

EAN: 4043718012886

Product Code: 1516528

R847

Mains Y-cable with earth pin to 2x IEC sockets for efficient power distribution

Efficient power distribution: Allows two devices to be connected simultaneously to a single socket, reducing the need for additional hardware

Space-saving installation: Eliminates the need for power strips and ensures a tidy and organised power supply

Flexible applications: Various cable lengths offer suitable solutions for different installation environments

Reliable power supply: Robust design ensures stable power transmission for connected devices

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The mains Y-cable enables efficient and space-saving power distribution via a single socket. It is ideal for operating two devices with IEC 355 connectors simultaneously without the need for additional power strips.
The well-designed Y-splitter supports organised cable routing. This ensures a tidier and more orderly installation. Different length options offer additional flexibility when positioning the connected devices.
The cable is designed for reliable use in a wide variety of environments. It supports a stable power supply and contributes to an optimised infrastructure.

Connection 1: EARTHED plug

Connection 2: 2x ITE plugs

Variants:

1 m (0.5 m + 2x 0.5 m), cross-section: 3G0.75 mm^2

1.80 m (0.9 m + 2x 0.9 m), cross-section: 1x 3G1.0 mm^2 + 2x 3G0.75 mm^2

3 m (1.5 m + 2x 1.5 m), cross-section: 3G1.0 mm^2

5 m (3 m + 2x 2 m), cross-section: 3G1.0 mm^2
