

# **Intellinet Gigabit PoE++ Injector, One 95 W Port, IEEE 802.3bt (4PPoE) Compliant, Plastic Housing, Wall-mount Option**

Model: 561495

Manufacturer: INTELLINET

EAN: 766623561495

Product Code: 1519019

## **R2,793**

Inject 95 Watts of Power Into Your Internet of Things (IoT) or PoE Network!

IEEE 802.3bt Compatible

The Intellinet Network Solutions Gigabit Ultra PoE Injector provides up to 95 W using all four pairs of twisted-pair network cabling to support IoT applications such as lighting, sensors and building automation. Nurse call systems require 30 to 50 watts of power. Point-of-sale card readers & printers

need up to 60 watts. Lighting fixtures and controllers require 40 to 50 watts. Some motorized IP cameras need more than 70 watts. The IEEE 802.3bt Ultra PoE standard is an excellent solution for bringing power to these critical systems. As many new IEEE 802.3bt powered devices enter the market, you'll be ready for them with an Intellinet Network Solutions Gigabit Ultra PoE Injector.

## **Full Compatibility with Existing IEEE 802.3af/at PoE Powered Devices**

The Intellinet Network Solutions Gigabit Ultra PoE Injector helps you connect your IEEE 802.3af/at-compliant products to a non-PoE LAN switch port. The injector can be used to connect a wireless access point, IP phone, network camera or any IEEE 802.3af/at-powered device (PD) to a switch.

## **Reduced Wiring Costs**

It's no longer necessary to run AC power lines for your wireless access point, network camera or IP phone. Simply connect the PoE Injector to the LAN switch port, and use the existing network cabling to deliver DC power as well as transfer data.

## **Protected Equipment**

Once DC power is connected to your networked equipment through the network cabling, the Intellinet Network Solutions PoE Injector ensures that your products are protected from power problems like short circuits (short GRND), current overloads and high voltages.
