with ViewSonic software, the IFP110 offers a comprehensive solution perfectly suited for the dynamic needs of in-person or hybrid scenarios.

Visualize Ideas on a Grand Scale

Elevate lessons to captivating experiences with the ultra-large 110" screen – equivalent to four 55" screens. The generous screen real estate offers an expansive canvas that immerses and inspires students. Uninterrupted by blurring or tearing, the 120Hz refresh rate ensures crystal-clear visuals for even the most dynamic content.

Break Down Communication Barriers

Experience next-level audio clarity with the integrated 8-microphone array and speakers. Noise-canceling technology captures every word with precision, ensuring that everyone is heard crystal-clear during hybrid meetings and lessons. Meanwhile, the speakers and powerful subwoofer add depth to every sound.

Uncompromising Performance

Powered by an octa-core CPU and running on the latest Android 13, the IFP110 delivers the performance you need. Experience wider compatibility with your favorite third-party apps and enjoy robust security features, all complemented by draggable apps on the home screen for a truly personalized user experience.

Safeguard Your Eyes

Prioritizing the well-being of both students and educators, the IFP110 seamlessly integrates flicker-free technology, a blue light filter, and an anti-glare coating to ensure crystal-clear visibility in any lighting condition. This allows students to focus during extended learning sessions without experiencing eye fatigue or distractions.

Your ViewBoard, Always in Sync

Striking the perfect balance between convenience and security, the IFP110 offers hassle-free sign-in options. Instantly access your personalized interface, app settings, and cloud storage through Google, Microsoft, and Apple single sign-on. Alternatively, use Guest Login to give guest users convenient access without compromising sensitive data and settings.

Tap & Go

Unlock the ViewBoard with a swift tap of an NFC card, gaining instant access to your personalized settings and accounts, including myViewBoard, Google, and Microsoft, all secured from unauthorized users.

Disclaimer: The NFC sign-in function will launch in Q2 2024.

Master Multitasking

Master your workflow with versatile multitasking capabilities. Seamlessly showcase apps or content from an external device using split-screen or floating windows, introducing new possibilities for truly dynamic workflows and presentations.

Command Attention with the 3-in-1 AirPen

Confidently present by connecting the AirPen. With air mouse, laser, and spotlight pointer functions, it empowers you to move freely for impactful presentations while maintaining effortless control of the display.

Accessories for Every Teaching Need

Whether adding a slot-in PC for enhanced performance, a web camera for immersive virtual learning, a motorized trolley cart for effortless mobility, or a document camera for capturing workings, the comprehensive range of accessories empowers you to customize the IFP110 to your teaching needs.

Unlock Student Potential

Engage your students, excite their minds, and inspire their curiosity with myViewBoard. Whether presenting in person or online, its intuitive whiteboarding tools let you streamline lesson planning

and deliver multimedia-rich, interactive lessons that captivate.

Break Free from Cable Clutter

Completing the comprehensive connectivity setup are three conveniently located USB-C ports. Providing a one-cable solution, they streamline your workspace, delivering swift multimedia playback, smooth data transfer, and up to 100W of device charging.

Seamless Screencasting

Effortlessly cast your device screen to the ViewBoard with Display. This built-in service enables instant sharing from compatible web browsers for a smooth and streamlined presentation experience — no cables or extra apps needed.

Embrace Collaboration with Wireless Casting

Enjoy expanded casting possibilities with the pre-installed vCast, allowing six-device simultaneous casting to the ViewBoard from desktop and mobile devices to the 110" display. Explore the versatility of split, extended, and grouped screen options, or effortlessly push lesson content to connected devices.

Efficient Device Management

Update, schedule, broadcast, and manage multiple displays simultaneously from any location via the secure, user-friendly Manager app. This centralized device management system empowers energy conservation through convenient remote on/off and ECO mode controls while enhancing campus communication with multimedia and emergency broadcasting functions.

Disclaimer: Multimedia broadcasts and ECO mode control are available with the optional Advanced license.

Go Green, Save Green

The IFP110 holds the prestigious EPEAT Silver certification, recognizing its adherence to rigorous energy consumption, supply chain carbon emissions, and end-of-life management standards. Perfect for schools aiming for a green future, it presents an energy-efficient and cost-effective solution that
