R2,106

Engineered to keep you productive. Lightweight, portable, reliable, comfortable.

It’s time to get ahead with the new standard of professionalism. From open office to open-plan living, Evolve2 30 opens doors to enhanced comfort, seamless collaboration, and instant concentration anywhere, whoever you are, and however you work.

MICROPHONE PERFORMANCE

Clear, collaborative calls.

When you’re working flexibly, you need to know you can be heard clearly wherever you are. Our

advanced 2-microphone audio system captures your voice while simultaneously analyzing and reducing the noise around you, meeting Microsoft Open Office requirements. The perfect way to get your point across and ensure even the smallest nuance isn’t lost in translation.

AUDIO QUALITY

Easy listening.

When time is of the essence, great quality audio is essential. With our professional-grade 28mm speakers and an advanced digital chipset, the Evolve2 30 delivers exceptional audio quality. So, whether you’re taking an important call or listening to music while you work, you can enjoy great sound that’s engineered for modern working.

UNIFIED COMMUNICATIONS (UC)

UC-certified means UC-satisfied.

‘Satisfaction guaranteed’ isn’t something you hear very often these days, but we’re bringing it back; Evolve2 30 works with all leading Unified Communications (UC) platforms, for truly seamless collaboration. If your UC platform of choice is Microsoft Teams, the Teams-certified variant is perfectly adapted and optimized to give you the best experience with the platform.

UC, it’s so easy.

COMFORT

Heavy on comfort. Light on the ears.

To get ahead, we measured heads. Hundreds of them. Then we used that data to design the perfect shape using biometric measurements. The result is a headset that’s been ergonomically designed to exert just the right amount of evenly distributed pressure, and built with premium materials, with soft memory foam ear cushions that mold to your ears’ natural contours.

DURABILITY

Flexibility you can depend on.

From the office, to your home, and even in your local coffee shop – when you work flexibly, your headset gets around almost as much as you do. We’ve re-engineered the design of the Evolve2 30 with a stainless-steel headband and slider for maximum durability. We’ve also significantly enhanced the design of the earcups, so internal and external components are more resistant to impact.

NOISE ISOLATION

Shh… we’re working.

Looking for a way to get some instant peace and quiet? Evolve2 30 is specifically designed to deliver portable concentration, with noise-isolating memory foam ear cushions and a pioneering angled earcup design. With this lightweight headset in your workbag, you’re only ever a second away from being able to hear yourself think.

BUSYLIGHT

Do not disturb.

The Evolve2 30 automatically knows when you need peace and quiet. An integrated busylight turns on automatically when you’re on a call, and you can also turn it on manually to signal ‘do not disturb’ mode.

Fewer interruptions; wherever your office is.

PLUG-AND-PLAY

Unbox. Plug in. Go.

Instant collaboration is where it’s at these days. Evolve2 30 is plug-and-play and comes with USB-A and USB-C connectivity, so you can unbox it and get going straight away.

It really is that simple. No, really.

TECHNOLOGY

Thinking outside the box.

As far as things in boxes go, this is kind of a big deal. Before you’ve even unboxed it, you’re holding a pioneering piece of tech that’s leagues ahead of any other headset. But because we have one eye on the future, firmware upgrades and value packs are already on the way to boost it even further.
