# InLine 35141W USB cable USB 2.0 1 m USB A 4 x USB-C White

Model: 35141W

Manufacturer: INLINE

EAN: 4043718346424

Product Code: 1524167

## R836

Efficient 4in1 design for simultaneous charging of four USB-C devices
Up to 25W charging power – ideal for smaller electronic devices
Space-saving solution to reduce cable clutter in the work environment
Reliable power supply via only one USB-A port
Ideal for IT rollouts, service teams and workplace solutions

The **InLine® USB 4in1 Y charging cable**has been specially designed for professional use to enable the parallel power supply of four USB-C end devices via a single USB-A power source. With up to 25 watts of charging power (split across four outputs), this cable is ideal for smaller devices such as power banks, headphones, scanners or smart gadgets - whether in the office, workshop or at trade fairs.Especially in environments where efficient use of resources is required, the Y-cable not only saves space, but also ensures tidy cable management thanks to its sophisticated design. Whether in the context of IT rollouts or in daily use by technical teams, this cable is a practical,

robust and versatile solution.

Connection A: 1x USB-A plug

Connection B: 4x USB-C plug

**Fast charging function: Not supported**

Application range: Compatible with small USB-C end devices

## How to use

Not recommended for smartphones, tablets and similar devices with smart charging logic: As this cable does not offer fast charging support and the maximum charging power is divided to 25 watts, it is not suitable for modern devices such as smartphones and tablets that require precise charging monitoring and fast charging times.
