

InLine Audio Adapter 6.3mm jack female / female Stereo

Model: 99307

Manufacturer: INLINE

EAN: 4043718045952

Product Code: 1525961

R791

Flexible connection of audio cables:The adapter allows two audio cables with 6.3 mm jack plugs to be easily connected, enabling quick adaptation of existing audio cabling.

Stereo audio transmission:The stereo design enables reliable transmission of left and right audio channels for clean signal transfer.

Robust contact solution:Nickel-plated contacts support stable signal transmission and reduce contact resistance when connecting audio components.

Compact adapter solution:The space-saving design allows for easy integration into existing audio installations or cable connections.

This audio adapter allows two audio cables with 6.3 mm jack plugs to be connected. The design with two 6.3 mm jack sockets is suitable for adapting existing audio connections or extending existing cable lengths.

The stereo version supports the transmission of left and right audio channels. Nickel-plated contacts support a stable connection between the connected plugs.
