

Thrustmaster T.Flight Rudder Pedals Black USB PC, PlayStation 4, Xbox

Model: 2960764

Manufacturer: THRUSTMASTER

EAN: 3362932914679

Product Code: 1526486

R3,037

You're cleared for immediate takeoff:

- The first rudder to feature the S.M.A.R.T slide rails system for smooth steering
- Ergonomic design allowing you to put your entire foot on the pedal, thanks to the heel-rests
- Heel-rests are removable, for alternative ergonomic configurations: put your entire foot on the pedal, or rest the ball of your foot at mid-pedal
- Differential braking: 2 large pedals (10 inches/25 centimeters)

S.M.A.R.T (Sliding Motion Advanced Rail Track) slide rails rudder

System of 4 slide rails crafted of industrial-grade aluminium for perfectly smooth sliding motion
Self-centering rudder axis: the perfect balance between smoothness and resistance for re-centering
Long range of travel on rudder axis for precise maneuvers
10-inch/25-centimeter footrest (12/45 shoe size) for rudder function
Versatile ergonomic design suitable for all types of flight (aerial combat, space adventure, civil flight, etc.)
With the heel-rest removed, you can control the rudder using the ball of your foot, with your heel on the floor
With the heel-rest in place, you can rest 100% of your foot on the pedal
Large base and inclined design combining comfort with stability

Two differential brake pedals

Large differential brake pedals: 10 inches/25 centimeters (12/45 shoe size)
Rounded central pivot with central grip, on the differential brake's axis
Pivot angle with a 15° range of travel: on an incline for deliberate activation, avoiding inadvertent activation when using the rudder

USB and/or proprietary RJ12 connectivity

On PC (Windows® 10/8/7/Vista), works with all joysticks on the market thanks to Thrustmaster's drivers***

On PC, compatible with all games supporting multi-USB and rudders

On PC and on PS4™, works with and connects directly to the Thrustmaster T.Flight Hotas 4 joystick*/**

Advanced Calibration Software

Go to ts.thrustmaster.com/ to download and install the advanced calibration software, which lets you:

Adjust the dead zones to your liking at the beginning and end of the range of travel on the rudder axis, and on the 2 differential brake axes.

Adjust the central dead zone to your liking on the rudder axis.

Save these adjustments directly in the internal memory of the adapter
