PRO Wood for Precision Drilling in Wood

Need a reliable auger bit you can use to make precise holes in wood quicker? Try the PRO Wood Auger Bit. We made it to help you drill deep holes – precisely where you need them.

The PRO Auger bit is a great choice for carpenters and woodworkers who need a fast and precise accessory to drill deep holes in hardwood and softwood. The bit has a strong screw tip that helps you start new holes precisely where you need them. The tip draws the auger bit into your workpiece, so you can drill with ease. Its main cutting edge is ground for sharpness. The flute's design ensures the chips are removed effectively, which means you get precise and dimensionally stable drilling.
