

Intellinet Gigabit High- Power PoE+ Injector, 1 x 30 W Port, IEEE 802.3at/af Compliant, Plastic Housing

Model: 561518

Manufacturer: INTELLINET

EAN: 766623561518

Product Code: 1528448

R1,410

Provide both power and data to a Powered Device (PD) using existing Cat5 cable and this PoE Injector.

The Intellinet Network Solutions Gigabit High-Power PoE+ Injector lets you connect your IEEE 802.3af/at-compliant product to a non-PoE LAN switch port. The PoE Injector can power and supply a network connection to a wireless access point, IP phone, network camera or any IEEE 802.3af/at-powered PD. This injector has an output power rating up to 30 watts. That's enough for even power-hungry PoE devices.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Reduce Wiring Costs.

There's no need to run AC power lines to get your PD set up and ready to do what it's supposed to. Simply connect the PoE Injector to the LAN switch port, and use the existing Cat5 cabling to deliver DC power as well as transfer data.

Protect Your Equipment.

Once DC power is connected to your networked equipment through the Cat5e/6 cabling, the Intellinet Network Solutions PoE Injector ensures that your products are protected from power problems like short circuits (short GND), current overloads and high voltages.
