R8,015

Lindy's range of Fibre Optic Hybrid Micro-HDMI 2.0 18G Cables with detachable connectors are the professional solution for extending Micro-HDMI, HDMI and DVI signals over longer distances, with no requirement for additional adapters. Combining the flexibility and high EMI and RFI resistance of fibre optic cable with standard copper cabling, these hybrid cables are ideal for use in critical AV setups or commercial installations.

Supplied as a thin cable with a premium metal, narrow Micro-HDMI connector, this can be installed easily through conduit and other small spaces with no damage caused to the internal cable structure, while the detachable HDMI and DVI connectors can be added at the ends of the

installation for connection to an even wider variety of displays and devices such as TVs, PCs or digital signage. This innovative design allows for a much wider range of connectivity solutions that can be customized freely by the user, including HDMI to DVI, HDMI to HDMI or DVI to a DVI display.

Supporting all the premium features that come with the HDMI 2.0 18G specification, these cables can deliver resolutions up to 4K at 60Hz, perfect for ensuring the best possible image quality in attention grabbing retail displays, immersive AV installations at events or a premium residential setup. HDR support ensures a much wider colour gamut, greater contrasts and an enhanced brightness to provide eye catching content even in outdoor or brightly lit scenarios. Multi-channel audio support including Dolby True HD and Dolby Atmos, also provides a more encompassing audio experience for the listener, complimenting the high quality video on display.
