Wire Stripper 160mm Professional: Further information

Product Highlights

The Bosch Professional 160-mm wire stripper, with its adjusting screw and spring-action shanks, can be precisely adjusted to strip cables up to 10 mm2 in diameter. The robust chrome vanadium steel shanks are ideal for repetitive stripping and are long lasting. Thanks to the ergonomic-shaped handles, with their soft grip and anti-slip shoulders, and the opening spring, the wire stripper is comfortable and safe to use, especially one-handed.
