Multiple lens combinations for all your needs

3+3MP

Ranger Dual offers 3+3MP lens combination options, so you can choose the most suitable and cost-effective combination for your security needs.

Light the night up with smartness

Ranger Dual can adjust different night vision modes according to your needs, whether you want the night vision to remain in full color all the time or want to turn on full color only when there is an event to save energy, it can always satisfy you.

The adjustable dual-lens gives you 360° protection

The Ranger Dual's pan-tilt lens supports 0°-355° horizontal rotation and 0°-90° vertical rotation, while the fixed lens supports 0°-355° horizontal rotation and 0°-15° vertical rotation to protect your home 360°.

Dual-channel detection powered by IMOU SENSE®

IMOU SENSE® is a self-developed AI algorithm under the IMOU brand, each of the two lenses of the Ranger Dual uses its own algorithm, which doesn't degrade the accuracy due to an increase in the number of lenses, giving it a 50% increase in overall accuracy and delivering the detection results back to you within 0.02 seconds.

Precise human & pet detection

With the support of IMOU SENSE™, the newly upgraded AI can effectively improve the accuracy of detecting people and pets, and can intelligently track the target; when there is an event triggered, in addition to pushing information to the user's phone, the device itself will also alarm.

Abnormal sound alerts to care for your treasures
