Create a mobile workstation wherever you work

Enable dual-4K displays, high-speed device connectivity, power, and networking from a single USB-C dock for consistent productivity anywhere.

Deploy Multi-Display Setups with Ease

Drive two 4K 60Hz DisplayPort displays on Windows, Linux, and ChromeOS to increase screen real estate. Ideal for hot desks and remote users who need instant multi-monitor setups.

Connect Devices and Keep Ports Free

Connect modern and legacy high-speed devices with 3x USB-C and 2x USB-A (5Gbps), while a dedicated USB-A 2.0 port handles keyboard and mouse dongles or other essential peripherals. Reduce hub sprawl and keep critical ports available for storage, capture, or field tools.

Deliver a Consistent Desktop Experience Anywhere

Provide 100W PD charging passthrough and Gigabit Ethernet for stable, wired performance at home, in the office, or while travelling. Standardize deployments with the same display, USB, and network experience to simplify rollouts and support.

Built for Sustainability, Designed for Performance

This hub features a housing made from 85% post-consumer recycled (PCR) plastic. The product also ships in FSC Mix packaging made from responsibly sourced materials. These materials help align your IT infrastructure with your organization's sustainability goals, without compromising on quality or durability.
