Product Code: 1534951

R5,385

Blitzwolf BW-VS10 100-inch Projection Screen

The BlitzWolf BW-VS10 100" projection screen is a solution designed for home theaters, providing better image quality even in less darkened rooms. It features a multi-layer PVC structure with an anti-reflective coating and a reflectance ratio of 1.1, resulting in a clear image. The large 100-inch projection surface and wide viewing angle make the screen ideal for both watching movies and group viewings.

Reduced glare and greater viewing comfort

The light absorption and reflection technology used reduces unwanted glare and improves image contrast. As a result, the screen performs better in rooms with artificial lighting or access to daylight. The image remains clear and less prone to interference, which translates to greater viewing comfort.

This is particularly important during longer movie sessions or when watching sports.

Wide viewing angle and image consistency

A 160° viewing angle allows for comfortable viewing from various spots in the room. The image maintains color and contrast consistency even when viewed from the side. This makes the screen well-suited for gatherings with larger groups. Additionally, the anti-glare coating helps reduce the impact of external light, ensuring the image remains clear even during the day. A reflectance ratio of 1.1 ensures natural brightness reproduction without excessive glare.

Large surface area and cinematic format

The screen offers a 100-inch diagonal in a 16:9 aspect ratio, which corresponds to the cinema standard. The large projection surface, over 2.2 meters wide, provides a more immersive experience. This makes watching movies, TV shows, or sports events feel like a cinema screening. It's the perfect solution for those who want to bring a big-screen experience into their own living room.

Slim construction and minimalist design

The ultra-thin 1.2 cm bezel gives the screen a modern look and doesn't distract from the displayed image. The high screen-to-body ratio allows you to focus on the content. The aluminum construction ensures the durability and stability of the entire frame. The whole unit fits well into various interior designs.

Included

- Inner Frame A x2
- Inner Frame B x2
- Inner Frame C x2
- Outer Frame A x2
- Outer Frame B x2
- Outer Frame C x2
- Support Rod x1
