

XTOOL M2 Standard 20W Laser Engraver

Model: P0101000642

Manufacturer: XTOOL

EAN: 6928819536395

Product Code: 1535020

R29,226

XTOOL M2 Standard 20W Laser Engraver

The XTOOL M2 20W laser engraver is a state-of-the-art device designed for laser cutting and engraving, with the added capability of a CMYK inkjet printing module. Equipped with a high-performance 20 W diode laser, it enables fast and precise processing of wood, acrylic, leather, paper, felt, and many other materials. The 426 × 320 mm working area ensures comfortable work on larger projects, while with the CMYK module installed, the machine also allows for color printing on selected surfaces using a 300 × 294 mm working area. Two built-in system cameras, automatic focusing, live preview, and the intuitive xTool Studio software significantly simplify project preparation. Its enclosed design with Class 1 safety certification, Wi-Fi and USB connectivity, and the ability to expand with additional modules make the XTOOL M2 20W ideal for both home workshops and professional product customization.

One device for cutting and engraving

The XTOOL M2 20W was designed for users who want a versatile device capable of handling a wide variety of projects. As standard, it enables precise laser cutting and engraving, and when upgraded with the optional CMYK inkjet module, it also allows for color printing on select materials. As a result, a single device can replace several separate tools, streamlining the entire creation and customization process. This model is ideal for creating decorations, nameplates, advertising materials, ornaments, personalized gifts, and handmade products.

More Power Means More Possibilities

The 20 W diode laser provides greater cutting performance than the 10 W version, making the device better suited for more demanding projects. The 0.06 × 0.08 mm laser spot ensures high precision during engraving, delivering sharp details and an aesthetically pleasing finish to your projects. In a single pass, the machine can cut linden wood up to 10 mm thick and black acrylic up to 8 mm thick, which reduces processing time and minimizes the number of laser passes. A maximum operating speed of 600 mm/s enables efficient completion of both individual projects and larger production runs, and the combination of high power with precise head guidance ensures consistent results in daily operations.

Precise positioning thanks to two built-in cameras

The M2 model is equipped with a 5 MP panoramic camera and a 2 MP close-up camera, which ensure accurate material positioning and display a real-time preview of the project. This allows the user to precisely position the graphic on the workpiece before starting the job, which reduces the risk of errors and minimizes waste. Automatic focusing further reduces setup time and eliminates the need for manual adjustments. This solution is particularly effective for batch production and the customization of finished products.

Wide Material Compatibility

The XTOOL M2 20W supports a wide range of materials used in manufacturing, crafts, and customization. The laser can process wood, MDF, opaque acrylic, paper, cardboard, leather, felt, rubber, glass, ceramics, aluminum, and stainless steel. When equipped with the CMYK module, the device also enables printing on paper, wood, canvas, fabrics, felt, leather, and glass. This allows users to carry out both simple hobby projects and more advanced commercial orders using a single

device.

Intuitive Operation and Ready to Use

The device is delivered fully assembled, so it takes very little time to set it up for use. The xTool Studio software offers a simple interface, ready-made templates, and support for popular file formats such as SVG, DXF, JPG, JPEG, PNG, and BMP, making it easy to design your own patterns. USB and Wi-Fi connectivity allow you to conveniently control the device from both Windows and macOS computers. Its intuitive operation makes it suitable for both beginners in laser engraving and more experienced users.

Safe Design for Everyday Use

The XTOOL M2 20W features an enclosed design that meets Laser Class 1 safety requirements, as confirmed by TÜV SÜD certification. This design limits the user's exposure to the laser beam during operation, enhancing safety for everyday use. Its robust construction and well-thought-out technical solutions ensure the device performs reliably during long hours of work on successive projects. This is the ideal solution for those seeking a high-performance laser engraver that combines high power, precision, and ease of use.

Included in the set

- XTOOL M2 laser engraver
- 20 W laser module
- CMYK inkjet printing module
- CMYK ink cartridge
- Laser module connection cable
- Power supply with power cord
- USB cable with adapter
- Fume exhaust tube
- Cable tie
- Lubricant
- Set of test materials
- Magnetic clamps

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

- Hex screwdriver
- Masking tape
- M3×6 screws
- CMYK module mounting screw
- Cartridge cover
- Cartridge cover mounting plate
- Cartridge lubricant
- A5 calibration card
- Ferrite core
- Safety instructions
- CMYK module manual
- Quick Start Guide

Manufacturer	XTOOL
Model	M2
Laser type	20 W diode (Blue Diode Laser)
Operating modes	Laser cutting, laser engraving, CMYK inkjet printing
Working area (laser)	426 × 320 mm
Working area (CMYK printing mode)	300 × 294 mm
Maximum operating speed	600 mm/s
Maximum cutting thickness for linden wood	10 mm (single pass)
Maximum cutting thickness of black acrylic	8 mm (single pass)
Laser spot size	0.06 × 0.08 mm
Positioning accuracy	up to 0.2 mm
Measurement accuracy	0.1 mm
Motion accuracy	0.01 mm
Camera system	5 MP panoramic camera + 2 MP close-up camera
Focus adjustment	automatic

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Connectivity	USB, Wi-Fi
Software	xTool Studio
Supported operating systems	Windows, macOS
Supported file formats	SVG, DXF, JPG, JPEG, PNG, BMP
Safety certification	Laser Class 1 (TÜV SÜD)
Device Dimensions	610 × 569 × 180 mm
Weight	12.3 kg
Maximum Power Consumption	200 W
Power Supply	100–240 V AC, 50/60 Hz
