Model: 23326

Manufacturer: TRUST

EAN: 8713439233261

Product Code: 1538156

R3,095

Reliable 800VA battery back-up UPS with 6 wall power outlets, suitable to power and protect your electronic devices

Back-up power

The Maxxon uninterruptable power supply (UPS) with built-in 800VA battery can keep electronic devices up and running temporarily if the main power goes down. Connecting your hardware to one of the three battery-powered outlets offers valuable time to save your work or in-game progress and safely shut down the equipment after a power outage.

Protect your equipment

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

All power outlets are surge-protected and the Automatic Voltage Regulation (AVR) function automatically corrects too high or too low voltage to ensure a stable 230V output voltage. The Maxxon UPS also protects your hardware from damage by surges, spikes and fluctuations from the power grid.

Multi-purpose

The Maxxon UPS is easily set up and can be used with electronic devices up to 360W, such as your PC, home automation system, alarm, NAS server, router/modem or gaming console. The convenient top-mounted outlets make sure you can place the Maxxon anywhere: on the floor, on your desk or even mounted to the wall.

Clear alerts

The UPS is equipped with clear optical and audible indicators to alert you when necessary. In this way, you can act immediately during a power outage and save your hard work before shutting down the device. Both your hardware and data are safe from damage when using the Maxxon UPS!
