3Doodler is one of those fantastic ideas that seem so obvious in retrospect that it is hard to believe that they are only now being implemented.

The premise is simple: the 3Doodler Start pen draws with a heated ECO-cartridge, which makes it possible to build 3D objects in the same way as a 3D printer, but without creating computer models.

The 3Doodler Start pen is extremely easy to use. To start creative play, just put the selected color of the ECO-insert in the guide and after a while your child can start creating. The only limitation is your own ingenuity.

3Doodler Start means endless possibilities of long and creative fun for your child !!!
