The outdoor unit connects to and controls two locks, at no extra cost

A single device can control both the garden gate and the garage door simultaneously, saving you money and effort.

Four unlocking methods for worry-free access

Card recognition, password entry (supports temporary passwords), one-touch unlocking from the internal panel, or remote access via the app. A variety of ways to open the door, tailored to your lifestyle.

Two-way communication is just like a face-to-face conversation

Crystal-clear real-time communication: interact with your family or send alerts remotely.

Night vision: the same clarity day and night

Activate night vision mode to ensure clear images all day long.

A fantastic, carefully designed user experience for the smart video doorbell

AI-powered person and vehicle detection, reducing false alerts

Accurately identifies pedestrians and vehicles, sending alerts only when it really matters.

Privacy mask, to keep your secrets hidden

You can block up to four specific areas within the video doorbell’s field of view; these areas will not be displayed in either the live feed or recorded footage.

Simple installation and excellent quality

PoE power supply: a single cable handles both power and network

Supports the 802.3at PoE standard, with no need for additional power cables.

Up to 512 GB of local storage

The large storage capacity allows you to retain video footage for longer periods.

Compatible with Google Assistant and Alexa

Connect to Google Assistant or Amazon Alexa and control your camera with simple voice commands.

Waterproof design, resistant to rain and sunlight

The VDP7 features a waterproof design, suitable for any adverse weather conditions and outdoor environments.
