

Cudy GS1024E network switch Managed Gigabit Ethernet (10/100/1000) Black

Model: GS1024E

Manufacturer: CUDY

EAN: 6971690794040

Product Code: 1547020

R2,794

Secure and High-Performance Switching

802.1Q/MTU/Port-Based/Voice VLAN

802.1Q VLANs allows creating secure and high-performance network segments across different managed switches. The other MTU/Port-Based VLAN enable simpler local VLAN configuration.

DSCP/802.1p/Port-Based QoS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

DSCP/802.1p QoS identifies DSCP packets in the tranmission and prioritize those latency-sensitive data.

Essential Management Features

Link Aggregation

Allows creating multiple LAG groups and multiply the transmission speed of the backbone in your networks.

DHCP Snooping

Assign an authorized DHCP server to prevent downtime when other rogue DHCP server connects into the network.

IGMP Snooping

Identifies the multicast groups connected to the switch and sends data to the exact ports instead of broadcasting them.

Loop Prevention

Automatically detects network loops and blocks affected ports. Supports STP/RSTP to ensure stable performance in large redundant networks.

Web Configuration and SNMP V1/V2

Management Made Easy

Monitor port status, configure VLAN groups, LAG, DHCP, and more in the intuitive configuration page. The device also features SNMP to allow remote and centralized control.

Managed/VLAN/Extend Preset Modes

Basic VLAN Mode

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Turn off management features and prevent downlink ports to communicate with each other, improving network security.

Extend Mode

Turn off management features and prolong the transmission to a maximum of 250 meters and simplify installation. These ports' speed will be capped at 10 Mbps.

Versatile Scenarios

Office Network

Mall Wi-Fi

Surveillance

ISP FTTB
