InLine 59910W computer case part Universal Push-button

Model: 59910W

Manufacturer: INLINE

EAN: 4043718353101

Product Code: 1548547

R823

Flexible PC power-on with external button and integrated power LED

Flexible positioning: The 2 m long connection cable allows the button to be mounted in an easily accessible position outside the PC case.

Easy installation: The pre-assembled 4-pin connector for the power switch and power LED is connected directly to the corresponding motherboard pins.

Integrated status indicator: The multi-coloured power LED displays the computer’s operating status directly on the external button.

Quick attachment: The double-sided adhesive pad allows for tool-free mounting on suitable smooth surfaces.

Reliable quality: The product is designed for direct connection to the designated motherboard pins

and enables neat, easily accessible operation.

With the InLine® Computer Power Switch Remote Cable, a computer’s power button can be relocated to a more accessible position. The 2 m long cable offers greater flexibility when positioning the button and is suitable for workstations where the PC case is difficult to access. The external button connects directly to the power switch and power LED connectors on the motherboard. The integrated multi-colour power LED indicates the system’s status. Thanks to the double-sided adhesive pad, the button can be attached to suitable surfaces without the need for additional mounting materials.

Cable length: 2 m
Connector for power switch and power LED
4-pin Dupont socket connector
Integrated multi-colour power LED
ABS housing
Double-sided adhesive pad for attachment
