InLine power cable, Euro male / Euro8 male, black, 10m

Model: 16654K

Manufacturer: INLINE

EAN: 4043718115013

Product Code: 1552100

R931

Wide compatibility for many applications: The power cord is suitable for numerous devices with a Euro 8 connection and is versatile in use.

Reliable power supply: The wire cross-section of 0.75 mm² ensures a stable power supply within the specified power values.

Standard-compliant plug quality: The Euro plug (CEE 7/16) and the IEC C7 device plug comply with current European standards.

Suitable for indoor use: The workmanship is designed for use in dry indoor areas.

Various lengths for flexible use: Available in different cable lengths for optimal adaptation to any environment.

The InLine power cable with Euro plug (CEE 7/16) to Euro 8 plug (IEC-C7) provides a safe and flexible power supply for a wide range of electrical devices with a Euro 8 connection. Whether for AV technology, power supplies, or household appliances, the cable is versatile for both professional and private use.

With a wire cross-section of 0.75 mm², the cable is suitable for a maximum power of 625 W at 250 V and 2.5 A. The robust plugs comply with European standards and ensure a reliable connection. Thanks to its various length options, the cable can be flexibly adapted to the respective environment.
It is suitable for indoor use and is the right choice for both professional installations and end users when quality and reliability are required.

Power plug: CEE 7/16, 2-pin (Euro plug)
Device plug: IEC-C7 / Euro 8 ("Figure-8")
Wire cross-section: 0.75 mm²
Rated voltage: 250 V AC
Rated current: 2.5 A
Maximum power: 625 W
Area of application: Indoor
