R1,141

InLine® Power Y-cable, 1x IEC-C14 to 2x IEC-C13

The InLine® Power Y-cable enables the simultaneous power supply of two devices via a single IEC connector. Thanks to its robust design and availability in various lengths, it is ideal for use in server rooms, data centres, IT workstations or industrial environments. It ensures efficient and space-saving cabling, especially in areas where several devices need to be operated in a confined space.

This Y-cable offers you a reliable and flexible solution for cable management and the power supply of several devices via just one power connection.
