InLine 16933A power cable Black 3 m IEC C13 IEC C14

Model: 16933A

Manufacturer: INLINE

EAN: 4043718345328

Product Code: 1552359

R1,044

Lockable C13 plug for maximum safety:prevents accidental disconnection even in the event of vibrations or tight installation situations.
Reliable connection for critical applications:ideal for server rooms, UPS systems, and professional AV installations.
Robust construction for demanding environments:durable PVC sheathing protects the cable from mechanical stress.
Flexible use in server cabinets and industrial systems:compatible with standard C13/C14 interfaces for a wide range of applications.
Ideal for energy-intensive devices and installations:enables stable power supply with high operational reliability.

The InLine® power extension cable with lockable C13 plug on angled IEC-C14 coupling is a professional solution for power supply in demanding IT and AV environments. The lockable IEC-C13 plug ensures a secure connection, even with vertical power strips, vibration, or confined spaces. This

minimizes downtime and increases the operational reliability of your systems.
The cable is ideal for use in data centers, 19" server cabinets, or industrial control systems. It enables a reliable connection between uninterruptible power supplies (UPS) and connected end devices such as servers, switches, monitors, or audio/video equipment. Even with frequent reconnection, the lockable plug remains stable.
The robust PVC sheathing protects the cable from external influences and makes it a durable solution for professional installations. Whether in broadcasting, test laboratories, or automation technology, this power cable reliably delivers the required power supply.

Connection: IEC-C13 (lockable) to angled IEC-C14 coupling
Area of application: Extension of existing power cables or connection to a UPS
Sheathing: Robust PVC
Color: Black
