C14 angled refrigeration unit cable to C5 for optimised cable routing

Space-saving cable routing: The angled C14 connector reduces the space required behind equipment and inside cabinets. This makes installation easier in confined spaces.
Reliable power connection: The combination of an IEC 60320 C14 connector and an IEC 60320 C5 plug ensures a secure connection to compatible devices.
Robust design: Moulded plugs increase stability in daily use and ensure a consistently reliable power supply.
Flexible length options: The cable is available in 1 m, 2 m, 3 m and 5 m lengths. This allows you to choose the right length for different installation routes.
Tidy installation: The 3-core PVC cable H05VV-F is easy to lay and supports structured, neat cable routing.

This power cable with an angled C14 socket to C5 plug is suitable for applications where a space-saving and reliable power supply is required. The angled design facilitates cable routing in areas with limited space behind the device. This makes the installation clearer and reduces mechanical stress on the connection. The moulded connectors ensure a robust connection during daily use. With lengths available from 1 m to 5 m, the cable can be selected to suit the installation situation. The cable is suitable for compatible devices with an IEC C5 connection and a power supply via IEC C14.

Connector 1: IEC 60320 C14 socket, angled

Connector 2: IEC 60320 C5 plug

Cable type: H05VV-F

Conductor: 3-core

Colour: black

Lengths: 1 m, 2 m, 3 m, 5 m
