InLine USB 2.0 4-Port Hub, USB-C male to 4x USB-A female, cable 15cm

Model: 33293J

Manufacturer: INLINE

EAN: 4043718315499

Product Code: 1552619

R856

The InLine® USB 2.0 4-port hub with USB-C connection expands modern end devices with four additional USB-A interfaces. It is suitable for the reliable connection of classic USB peripherals to systems with a USB-C port.

The hub operates according to the USB 2.0 standard and enables data transfer rates of up to 480 Mb/s. This makes it ideal for mice, keyboards, printers, scanners or USB storage media.

The integrated 15-centimetre connection cable allows for flexible positioning. No external power supply is required. Power is supplied directly via the USB-C port. Up to 500mA is available per port.

The robust black plastic housing ensures unobtrusive integration into existing environments.

Installation is possible without additional drivers from Mac OS X v10.8 and Windows Vista onwards.

The hub is an economical and functional solution for expanding existing USB infrastructures.
