solution for protecting mobile and stationary devices. Equipped with a 2 m long steel cable and a robust lock head, it is suitable for use in professional environments such as offices, sales areas, trade fair stands, or educational institutions. The four-digit combination lock allows for easy, keyless use with 10,000 possible combinations. The lock is compatible with all standard 3x7 mm security slots, as found on notebooks, PC cases, monitors, or projectors. The nickel-plated zinc alloy housing emphasizes the high quality of the product. Thanks to the flexible cable routing, the lock can be quickly and reliably attached to fixed objects such as table legs, shelves, or eyelets. Whether as a standalone solution for mobile employees or as part of a comprehensive IT security strategy, the InLine® security lock provides a reliable basis for protecting your devices.
