

InLine Monitor Platform Aluminium 63mm, max. 10kg

Model: 23175A

Manufacturer: INLINE

EAN: 4043718293988

Product Code: 1553094

R1,292

Optimized ergonomics:The platform raises the monitor by 63 mm, ensuring a natural viewing height and back-friendly working in everyday office life.

High-quality aluminum construction:Made from robust, anodized aluminum for maximum stability and an elegant look in professional working environments.

More space on your desk:Keyboard, mouse, and accessories can be stored under the stand to save space and create a clean work surface.

Stable base:Non-slip silicone pads prevent slipping and protect sensitive surfaces from scratches.

Durable and easy to clean:The resistant material is wear-resistant and easy to clean—ideal for everyday use.

The InLine monitor stand made of high-quality aluminum offers a simple way to design workstations ergonomically and efficiently. Raising the monitor by 63 mm achieves an optimal viewing height,

which supports a natural head posture and reduces strain on the neck and shoulders.

Thanks to its solid construction made of anodized aluminum, the platform offers high stability with a load capacity of up to 10 kg. The minimalist design blends harmoniously into modern office environments and underlines the professional overall impression of the workplace.

Additional storage space is available under the platform – ideal for a keyboard, mouse, or documents. Non-slip silicone pads ensure a secure hold and protect the work surface from scratches. With its easy-care surface and timeless look, the InLine monitor platform is suitable for a variety of work environments – from individual workstations to complex office landscapes.
