

InLine 44432F PoE adapter Gigabit Ethernet

Model: 44432F

Manufacturer: INLINE

EAN: 4043718352371

Product Code: 1553396

R3,107

Gigabit PoE injector with 60 W, IP67 and IEEE 802.3bt for robust network installations

Power and data via a single network cable:The PoE injector supplies compatible network devices with both data and power via the same cable. This simplifies installation in hard-to-reach locations.

Suitable for demanding environments:IP67, IK10 and the metal housing support use in harsh environments and outdoor installations.

High PoE power output up to 60 W:Support for IEEE 802.3af, 802.3at and 802.3bt enables the power supply of compatible devices with higher power requirements.

Gigabit-capable network connection:2x RJ45 ports with 10/100/1000 Mb/s auto-negotiation support stable data transmission for modern network applications.

Easy integration without configuration:Plug-and-play functionality and automatic detection of

compatible devices enable rapid commissioning.

The Gigabit PoE injector is designed to supply power and data to compatible network devices via a single network cable. This simplifies cabling where no separate power supply is available at the installation site or where installation effort needs to be minimised.

With a PoE power output of up to 60 W and support for IEEE 802.3af, IEEE 802.3at and IEEE 802.3bt, the device is suitable for compatible end devices with varying power requirements. Gigabit support via 2x RJ45 10/100/1000 Mb/s ensures that, in addition to the power supply, a modern network connection is also available.

The robust design, featuring a metal housing and IP67 and IK10 ratings, supports use in demanding environments. The temperature range of -20 °C to 60 °C further expands its range of applications. This makes the PoE injector suitable for installations where reliability, protection and easy integration are required.

Product type:Gigabit PoE injector

PoE standards:IEEE 802.3af, IEEE 802.3at, IEEE 802.3bt

PoE power:up to 60 W

Network connections:2x RJ45 10/100/1000 Mb/s auto-negotiation

AC input:100–240 V, 50/60 Hz

Transmission distance:up to 100 m

Protection rating:IP67

Impact resistance:IK10

Housing:metal

Operating temperature:–20 °C to 60 °C
