

Etenwolf S7 Car Air Compressor, 11.03 bar, 38,400 mAh

Model: S7ET

Manufacturer: ETENWOLF

EAN: 6978763360041

Product Code: 1555981

R4,924

Etenwolf S7 Car Compressor, 11.03 bar, 38,400 mAh

The Etenwolf S7 (Vortex S7) is a high-performance car compressor designed for quickly inflating large vehicles and demanding off-road applications. The unit is equipped with a 38,400 mAh battery, a 260 W two-cylinder motor, and a system that allows it to operate in both high-pressure and high-airflow modes. The compressor reaches a maximum pressure of 160 PSI (11.03 bar) and an airflow of up to 54 L/min, making it ideal for pickup trucks, off-road vehicles, RVs, SUVs, passenger cars, motorcycles, and bicycles. It can also be used to inflate mattresses, pools, air pillows, and other inflatable recreational accessories.

260 W of power and lightning-fast inflation of large tires

At the heart of the unit is a powerful 260 W two-cylinder motor, which delivers up to twice the power of the brand's corded compressors. A maximum airflow of 54 L/min allows you to inflate a 30-inch SUV tire in about 30 seconds. The compressor easily handles tires up to 35 inches in diameter, making it an excellent choice for owners of large pickup trucks, SUVs, and RVs. A measurement accuracy of ± 1 PSI allows you to maintain the correct pressure with great precision.

High Performance

The built-in 38,400 mAh lithium battery ensures an exceptionally long runtime. It can inflate up to 33 Ford F-150 tires in size 245/70 R17 from 30 to 35 PSI on a single charge. The device can also handle up to 40 SUV tires. Such a large energy reserve makes the compressor ideal for long trips, off-road adventures, and working with multiple vehicles. An additional advantage is its ability to remain ready for use for up to 24 months in standby mode.

Power Bank Function and 45 W USB-C Fast Charging

The S7 also functions as a high-performance power bank, allowing you to charge smartphones, tablets, and other electronic devices while on the go. The USB-C port supports 45 W bidirectional fast charging, enabling both the compressor itself and connected devices to charge quickly. This practical solution is particularly useful during camping trips, off-road adventures, and longer journeys.

Two Inflation Modes

The device features a dual-system design that allows you to adjust its operation to a specific task. High-pressure mode is designed for inflating tires on cars, pickup trucks, RVs, motorcycles, and bicycles. High-flow mode, on the other hand, allows for quickly inflating air mattresses, air pillows, inflatable pools, and other large accessories that require a large volume of air. As a result, a single unit can replace several different devices.

Durable Construction for Heavy-Duty Use

The compressor is designed for many years of use. Its construction is optimized for a 100% duty cycle, allowing for continuous pumping without the need for breaks. The cooling system minimizes

component overheating, and the durable two-cylinder design ensures a service life of up to 10 years. As a result, the S7 performs well in both everyday use and more demanding applications.

Easy-to-read display and LED lighting

The digital screen displays the current and target pressure, allowing for convenient monitoring of operating parameters. The automatic stop function halts pumping once the set value is reached, enhancing user comfort. The built-in 1,000-lumen LED light provides effective illumination when working after dark, and the additional flashing and SOS modes can be useful in emergency situations. The housing also features a storage compartment for accessories, allowing you to conveniently store adapters and nozzles.

Included in the set

- Car compressor
- 45 W AC charger
- Charging cable
- High-pressure hose
- High-flow hose
- Ball needle
- Presta adapter
- Clamp adapter
- Carry bag

Manufacturer	Etenwolf
Model	S7 (Vortex S7)
Battery capacity	38,400 mAh
Maximum pressure	160 PSI (11.03 bar)
Maximum Air Flow	60 SLPM
Output Power	260 W
Input Power	45 W

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Measurement Accuracy	±1 PSI
Motor	Twin-cylinder
Charging Port	USB-C
Fast Charging	45 W
Display	Digital
LED lighting	1000 lm
Standby time	up to 24 months

Operating temperature range from -20°C to 74°C

Gross weight: 4250, Net weight: 4150, Box length: 33,50, Box width: 28,00, Box height: 18,00, GPSR
